

Make a Switched On rail safety poster

Design a rail safety poster to help everyone stay Switched On and safe. You can base your poster on railway tracks, level crossings, overhead line equipment, or even all three! Whatever you decide, help us spread the message that we can all enjoy life's adventures as long as we remain 'Switched On'!

Think about these four points:

- Never play near train tracks or on the train platform
- When on a train platform, concentrate – it's easy to get distracted
- Don't cross level crossings until safe to do so
- Never play near overhead line equipment
